## NOTES

The following conventions have been used in the compilation of this index :

- 1) The words ‘A’, ‘The’, ‘An’ etc. have been ignored when occurring at the beginning of a title, *except* when forming part of the name of a locomotive, when they are added at the end, i.e. ‘Earl, The’.
- 2) I hope members will not feel it necessary to complain about the distinction between ‘Narrow Gauge’ and ‘Miniature’! This subject has been well aired in previous Society publications - our accepted convention is to regard anything of 15”-gauge or less as miniature, anything larger (up to 4’6”) as narrow-gauge.
- 3) Each entry in the index is listed as Issue No./Page No.; un-numbered pages are given the next available number after a previous numbered page. If an article has several references to or illustrations of an individual locomotive etc., only the first reference will be entered.
- 4) Letters referring to a previously-published article are indexed under the title of the article; those on un-related matters are listed under ‘Letters’.
- 5) Named locomotives are listed twice, under their name and also (if given) under their Builders Works No./Year of building. Because of the vast number of miniature locomotives, only the more significant examples are listed.
- 6) For the purpose of this index, ‘British Isles’ includes all Ireland and the Channel Isles.
- 7) Trams and railcars are indexed under Locomotives
- 8) Rolling Stock entries are only listed where extensive, rather than passing, reference is made.
- 9) Articles are listed under their titles as printed. If the subject matter is not obvious from the title, a separate listing is made under ‘Titles : Subject Matter’.

Please advise the compiler of any significant errors or omissions.
